Examples of Collaborative Tools Used During Remote-Learning

Saturday, April 17, 2021 10:10 AM (20 minutes)

In this presentation, I will first give a brief introduction to my research stream which concentrates on particle physics within UMD's First-Year Innovation & Research Experience (FIRE) program. I will, then, highlight two of the collaborative online tools I have used during the pandemic virtual-learning as part of my synchronous meetings. I have used these tools both for community building as well as research activities. I will give a couple of examples from Google's Jamboard interactive whiteboard, as well as one example from Mentimeter online collaboration tool, and share my experiences using such tools.
