Is Quantum in HS Crazy?

Saturday, October 23, 2021 11:00 AM (1 hour)

If someone were to tell you that technology is not important, you would think they were crazy, especially after all the technology that was used during COVID. The National Quantum Initiative was signed into law in 2019 with the intent of increasing awareness at the K-12 level as to the importance of quantum in technology, national security, and future jobs. The Quantum for All project is focusing on this initiative using an NSF grant to help get quantum information science in the HS curriculum. This talk will give an overview of the project and how the challenges are being addressed.
