# Experimental Projects for a Capstone Engineering Physics Course at Delaware State University

**Aristides Marcano Olaizola**

*Division of Physics, Engineering, Mathematics, and Computer Science, Delaware State University,  
1200 North DuPont Highway, Dover, DE 19901, USA.*

**The presentation discusses capstone experimental projects designed for senior students majoring in Engineering Physics at Delaware State University.**

**How to develop a full immersion experience in experimental Physics and Engineering under the conditions of low budget.**

- **Related courses**
  - **Theoretical and Experimental Research (PHYS 418)**
  - **Introduction to Research (PHYS 451)**
- **Capstone experience for senior students majoring in**
  - **Engineering Physics**
  - **Physics**

# Experiments Proposed

## Electrical Engineering

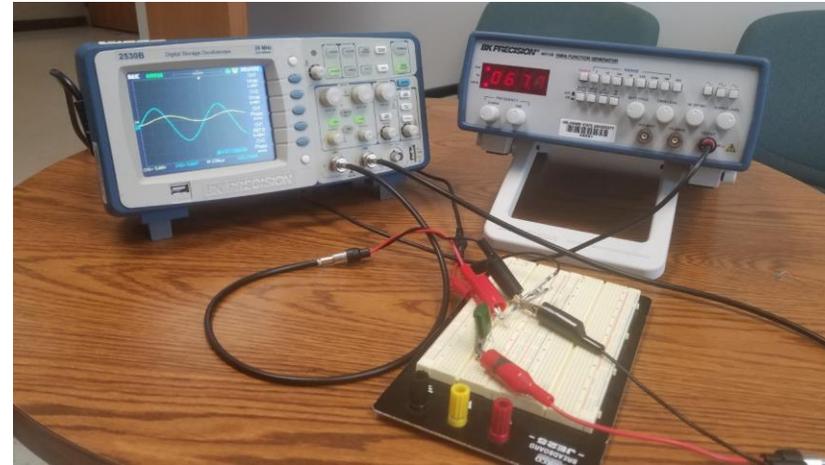

Resonant circuit

Damping electrical oscillator

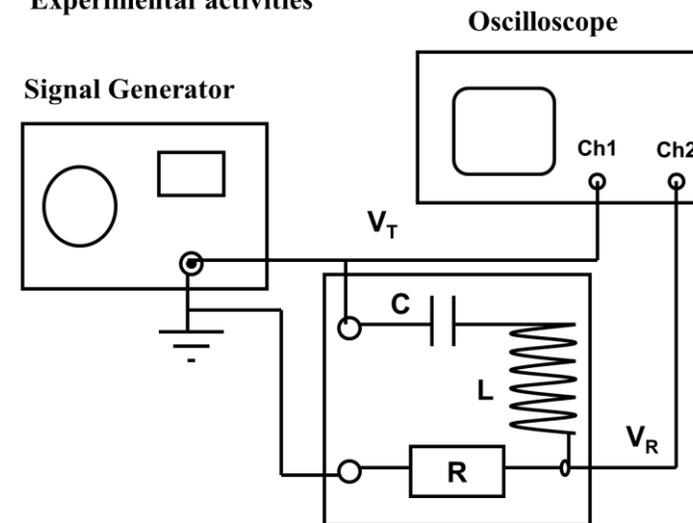

Diode rectification circuit

RC time constant

A-V characteristics of linear and nonlinear resistances

Experimental activities

# Modern Physics

Photoelectric effects and Planck constant.

Frank-Hertz experiment

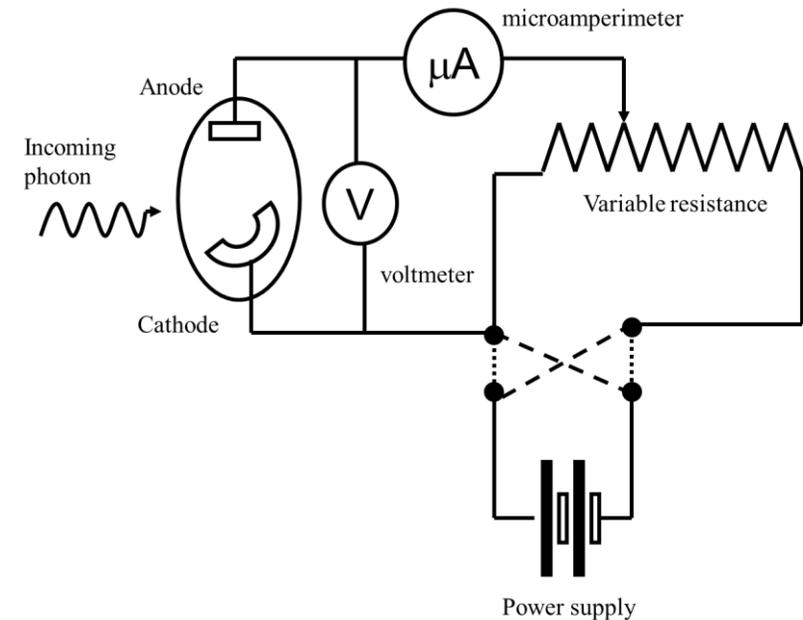

Hydrogen spectrum and Bohr's model

Black body radiation spectrum

Miliken's experiment\*

e/m determination\*

\* Under development

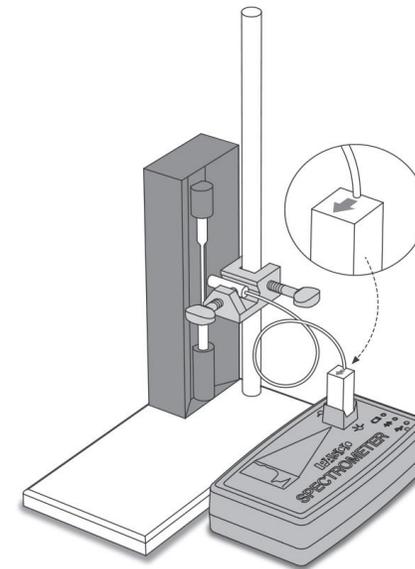

# Optics and Spectroscopy

Characterizing a Gaussian beam

Absorption spectroscopy

Measuring radiance and irradiance

Spectra of light sources

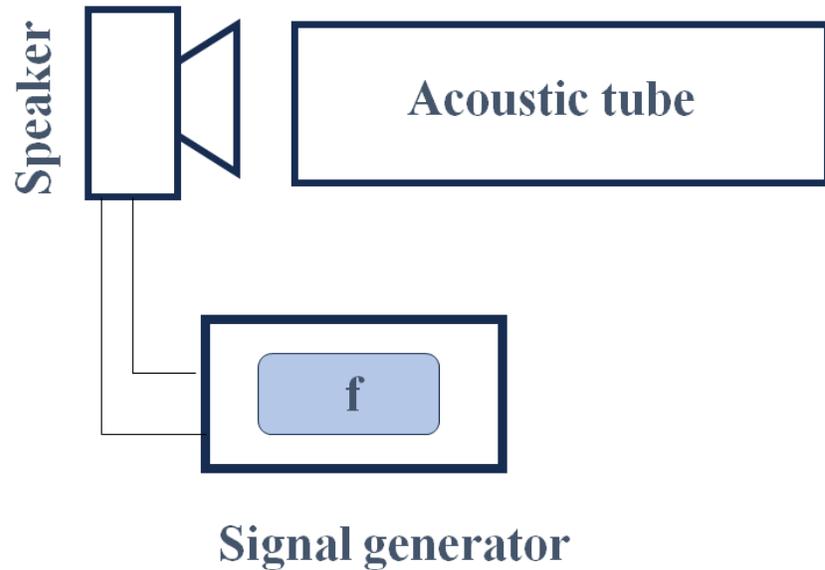

# Acoustics

Modes of a tense string

Measuring the speed of sound

Resonances in an acoustic tube

Mersenne's laws

# Renewable Energy Technology

Efficiency of a photovoltaic plate (PVP)

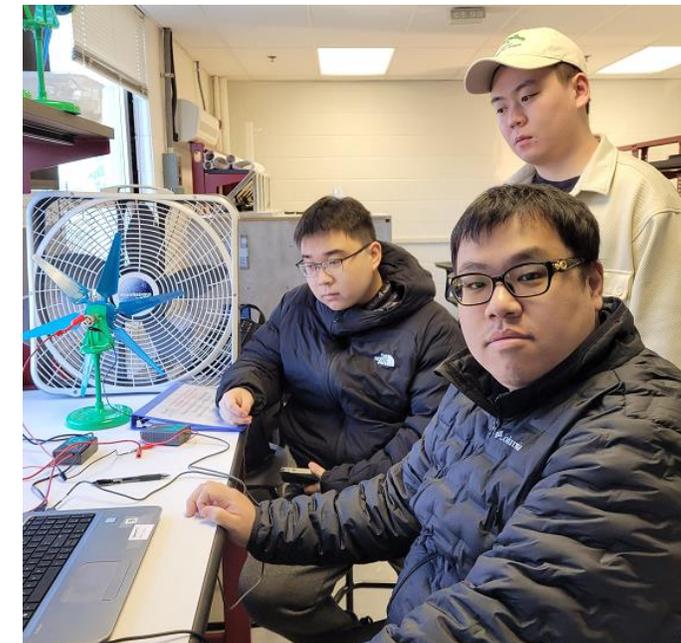

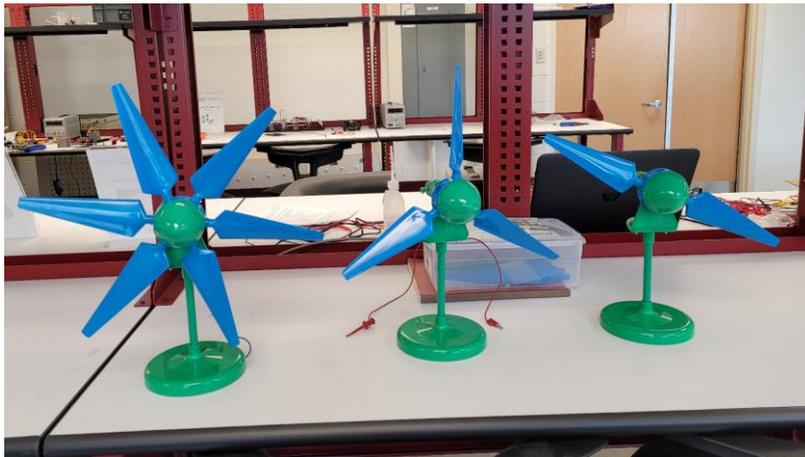

A-V characteristic of a PVP

Wind turbines power generation.

Electrolysis and fuel cell reactions.

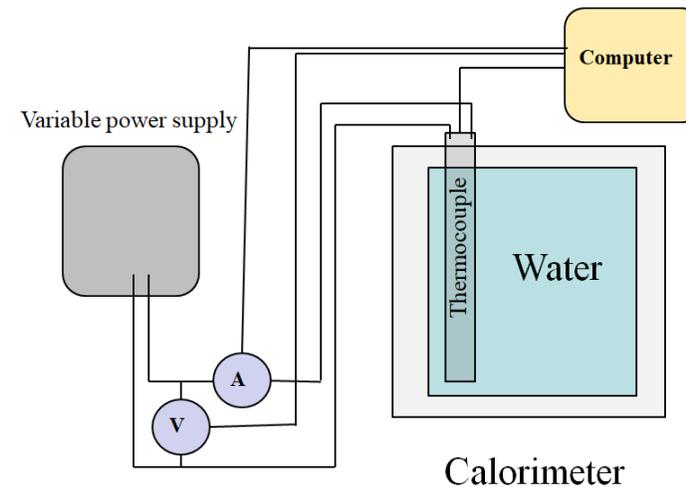

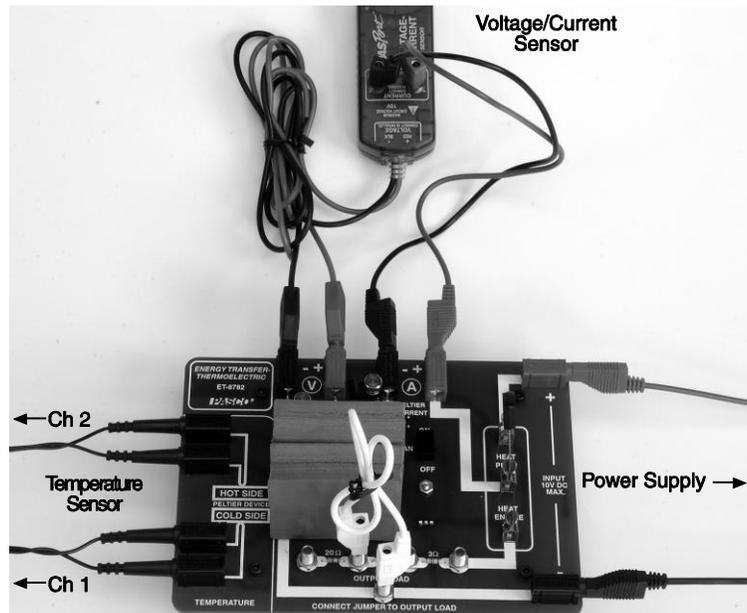

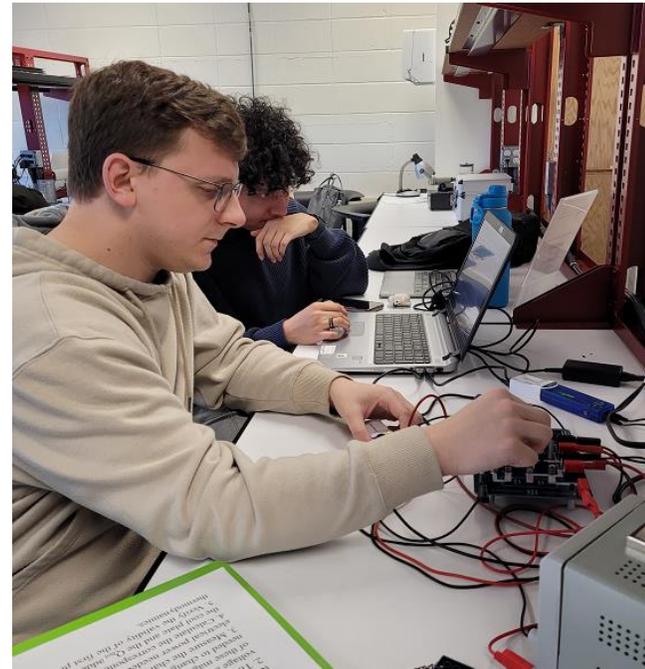

PVP in series and parallel

Hydropower generator.

# Thermodynamics

Specific heat of a solid  
Peltier and Seebeck's effects  
First law of thermodynamics  
Heat- Energy equivalence

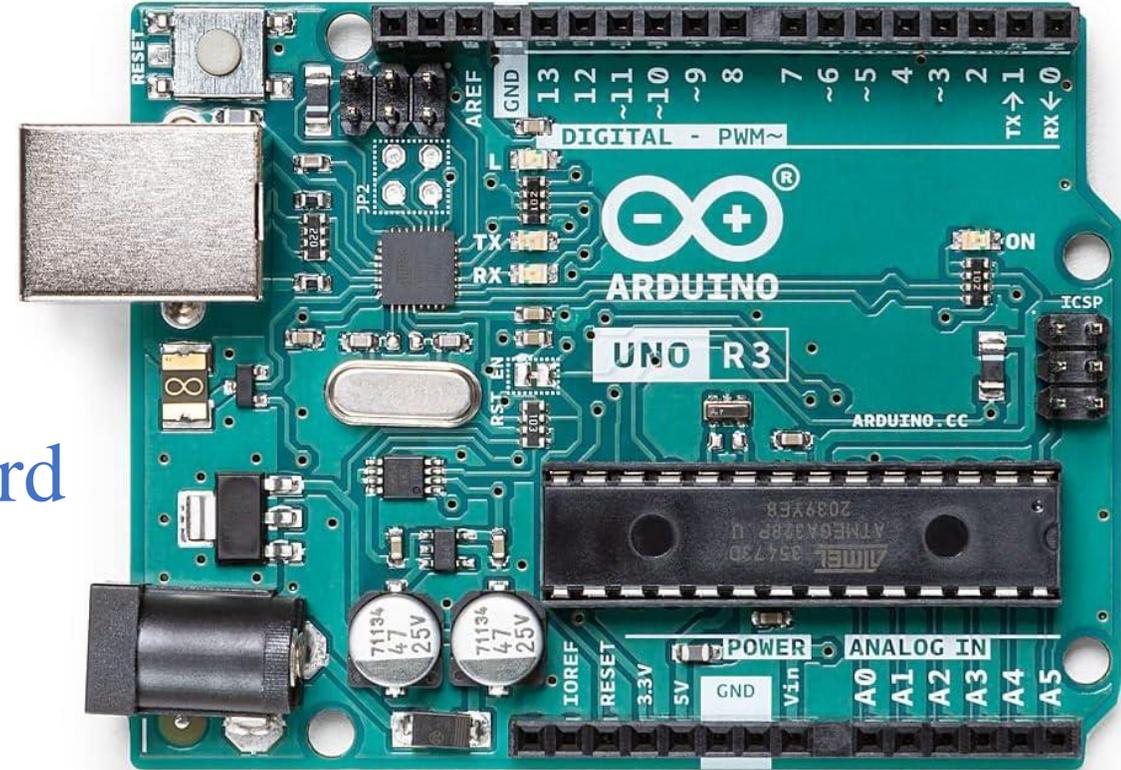

# Written Reports

- 1. Introduction (20 %)**
- 2. Experimental method (20%)**
- 3. Initial data (20%)**
- 4. Analysis and discussion (30%)**
- 5. Results and conclusions (10%)**

# Arduino Technology

Arduino is an Italian open-source hardware and software company, project, and user community that designs and manufactures single-board microcontrollers and microcontroller kits for building digital devices.

# **The Arduino projects include**

Microcontroller technology

Programming

Service applications

# Project 1: Switch Controlled LED

```
const int buttonPin=2;
const int ledPin=13;
int buttonState=0;

void setup(){
  pinMode(ledPin, OUTPUT);
  pinMode(buttonPin, INPUT);
}

void loop() {
  buttonState= digitalRead(buttonPin);
  if (buttonState ==HIGH {
    digitalWrite(ledPin, HIGH);
  }
  else {
    digitalWrite(ledPin,LOW);
  }
}
```

# Lectures

## Introduction to Research

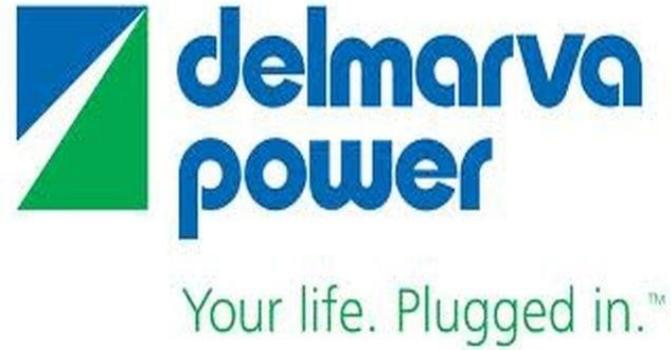

- **The purpose of science**
- **The importance of ethics in science**
- **Denying science**
- **Renewable energy revolution**
- **Pandemics**
- **Oral presentation basics**

# **Theoretical and Experimental Research**

- **Scientific publications**
- **Principles of Mechanics**
- **Electromagnetism**
- **Quantum Mechanics**
- **Quantum Computing**
- **AI revolution**
- **Poster presentation basics**

## **Conclusions**

**We have developed a full immersive learning experience in Physics and Engineering for senior students majoring Engineering Physics and Delaware State University. Applying a similar approach starting at freshman years should represent a substantial impact in the quality of our graduates.**

## **Acknowledgements**

**The author thanks Delmarva Power for supporting the Renewable Energy Education Center (2017-2024).**
