

Virginia Tech, Blacksburg, Virginia, USA July 20-25, 2025

23<sup>rd</sup> International Conference on Electron Dynamics in Semiconductors, Optoelectronics and Nanostructures (EDISON 23)

The 23<sup>rd</sup> International Conference on Electron Dynamics in Semiconductors, Optoelectronics and Nanostructures will be held at Virginia Tech, Blacksburg, Virginia, USA, July 20-25, 2025. It is the 23<sup>rd</sup> meeting of the international conference series formerly named Hot Carriers in Semiconductors (HCIS), first held in 1973 in Modena, Italy, and since 2009 running under the name EDISON. Past conferences in this series were organized in Buffalo, USA (2017), Nara, Japan (2019) and Münster, Germany (2023).

### Conference Chairs

Chair: Jean J. Heremans (Virginia Tech, USA) Co-Chair: Satoru Emori (Virginia Tech, USA) Co-Chair: Victoria G. Soghomonian (Virginia Tech, USA)

International Advisory Committee
Jonathan P. Bird (University of Buffalo, USA)
Robert H. Blick (University of Hamburg, Germany)

Paolo Bordone (Univ. of Modena and Reggio Emilia, Italy)

Ned J. Ekins-Daukes (Univ. of New South Wales, Australia) Elena Gnani (University of Bologna, Italy)

Tomás González (University of Salamanca, Spain)

Stephen M. Goodnick (Arizona State University, USA)

Jean J. Heremans (Virginia Tech, USA)

Kazuhiko Hirakawa (University of Tokyo, Japan)

Thomas Ihn (ETH Zürich, Switzerland)

Wojciech Knap (Polish Academy of Sciences, Poland)

Tilmann Kuhn (University of Münster, Germany)

Seung J. Lee (Dongguk University, South Korea)

Paweł Machnikowski (Wrocław U. of Science & Techn., Poland)

Nobuya Mori (Osaka University, Japan)

Akira Oiwa (Osaka University, Japan)

Amalia Patanè (University of Nottingham, UK)

Umberto Ravaioli (University of Illinois, USA)

Andrew Sachrajda (NRC Ottawa, Canada)

Ian Sellers (University of Buffalo, USA)

Luca Varani (University of Montpellier, France)

Jiannong Wang (Hong Kong Univ. of Science & Techn., China)

Hiroshi Yamaguchi (NTT Laboratories, Japan)

Ilaria Zardo (University of Basel, Switzerland)

## **Program Committee**

D. Guy Austing (McGill University & NRC Ottawa, Canada)

Jonathan P. Bird (University of Buffalo, USA)

José Caridad (University of Salamanca, Spain)

Saskia F. Fischer (Humboldt University of Berlin, Germany)

Stephen M. Goodnick (Arizona State University, USA)

Jean J. Heremans (Virginia Tech, USA)

Kazuhiko Hirakawa (University of Tokyo, Japan)

Tilmann Kuhn (University of Münster, Germany)

Paweł Machnikowski (Wrocław U. of Science & Techn., Poland)

Akira Oiwa (Osaka University, Japan)

Amalia Patanè (University of Nottingham, UK)

Thang Pham (Virginia Tech, USA)

Christina M. Rost (Virginia Tech, USA)

Andrew Sachrajda (NRC Ottawa, Canada)

Ian Sellers (University of Buffalo, USA)

Luca Varani (University of Montpellier, France)

# Conference Scope

The focus of the EDISON series is on the fundamental physics and applications of nonequilibrium classical and quantum carrier dynamics in semiconductors, optoelectronic devices, and nanostructures. Specific topics of particular interest include:

- Nonequilibrium electronic and thermal transport in materials, nanostructures and devices
- Terahertz phenomena in materials and devices
- Mesoscopic transport phenomena
- Electronic and optical properties of low-dimensional systems, including 2D materials and their heterostructures
- Fluctuations and noise in nonequilibrium carrier dynamics
- Carrier and phonon dynamics, including for quantum and sensor/detector technologies
- Carrier dynamics in ultrafast optical phenomena
- Spintronics, spin coherence, and magnetization dynamics
- Electronic properties, optical properties, and phase transitions of topological materials and devices
- Charge dynamics in energy conversion and energy harvesting processes
- Interaction of charges with plasmonic, phononic and mechanical excitations

# **Location and Important Dates**

The conference will be held on the Virginia Tech campus in Blacksburg, Virginia, USA.

Abstract submission deadline: March 21, 2025 Notification of acceptance: April 30, 2025
